Secure Mode

Secure mode gives the option to lock the 001Touch™ internally with a key. This secures the door on both sides with the ability to unlock the door with Yale Home App, a PIN code or Keytag externally.

User Code that Expires*

A temporary code can be programmed to last from three hours to two weeks. This is ideal when a tradesman needs access for a few hours or when a neighbour is house sitting.

Visual Guide for Programming

For added convenience, an illuminated guide will assist in the programming of key features.

Low Battery Alarm

The Low Battery indicator on the front of the lock illuminates when battery level is low. You will also receive the low battery warning from Yale Home App and email once you connected to Yale Home App.

Smart Memory

The settings, codes and key cards will remain programmed in the lock in the event the batteries are depleted.

Emergency Battery Connection

9V battery backup terminal is at the front of the lock to gain access, if the batteries are flat.

*Check the next page for details on the feature differences with and without connecting to the Yale Home App

Product Features with/without connecting with Yale Home App

	Lockwood 001 Touch Plus	Lockwood 001 Touch Plus + Home Module	Description

Auto Re-lock On/Off	Yes	Yes	

NOTE: You can use a mix of up to 20 PIN codes, Key Tags when Yale Home Module is not connected.

To enable mobile app functionality we highly recommend to connect your lock with yale home app immediately after setting up the master code.

For security reason when the lock get registered with Yale Home App, the lock enables 'Home App mode' and preventing the user to register the credentials from keypad (such as: add/remove user code / key tag except the master code).

All existing credentials (user code / key tag) will be erased as initialisation except the master code.

It is HIGHLY RECOMMENDED to register the credentials through Yale Home App only.

*Functions are local access only, the Yale Connect Bridge is sold separately to achieve remote control and access.

001Touch Plus™ Smart Deadlatch

001Touch Plus™
Smart Deadlatch

For over 40 years Lockwood's iconic 001 Double cylinder Deadlatch has been securing homes in Australia. Now you can upgrade your mechanical 001 Deadlatch to a smart solution.

Connected by Yale Home App*
The 001 Touch Plus Smart Deadlatch, connected by Yale Home*, opens up your home to a range of smart lock features. You can control your lock using a PIN code, a Key Tag, or simply from your mobile devices. Using varying technologies including Bluetooth and GPS as well as the Yale Home App, the auto unlock function unlocks your door as you approach. With 24/7 lock activity, you can see who and when people accessed your lock, when your mobile is connected to the lock via Bluetooth. The DoorSense™ position sensor checks the status of your door and tells you if your door is open or closed.
Ideal External Door Lock
The Lockwood 001Touch Plus™ operates with a Deadlatch and is suitable for use as a standalone lock or with an additional latch and lever/ knob.

Remote Access and Works with
The 001Touch Plus Smart Deadlatch can be upgraded with the Yale Connect Plus Wi-Fi Bridge (sold separately) to access your lock remotely, as well as voice assistant capability - easily integrate it into your Google, Samsung or Alexa enabled smart home devices.

Retrofitable

Compatible with most 60mm backset deadlaches**
