

Threshold Plates and Ramps

IS4140

The IS4140 threshold plate is used when a flat sealing surface is required where carpet runs under the door. It is used in conjunction with other Kilargo door bottom seals to help prevent draught, insect and smoke penetration.

Their low profile ensures compliance with the 'access for people with disability' requirements, particularly for wheelchair traffic.

The durable, anodised profile has a snap-fit cover strip for concealed fixings.
